Dataset descriptions

R. Cassano-Coleman

2025-02-25

This notebook calculates basic descriptors of the memory dataset.

Load the data.

There are 1213 original memories.

```
## # A tibble: 630 x 61
##    internal_id song_id age_at_event_orig age_at_event_cover association_orig
##          <dbl> <chr>               <dbl>              <dbl> <chr>
##  1           1 2017_2                 21                 20 I do not associate ~
##  2           2 2008_2                 17                 17 It is an old song b~
